

A summary of the adult social care sector and workforce in Eastern

2022/23

A summary of the adult social care sector and workforce in Eastern

Skills for Care is the strategic workforce development and planning body for adult social care in England. We work with employers, Government, and partners to ensure social care has the right people, skills, and support required to deliver the highest quality care and support, now and in the future. Our role is to respond and adapt to the emerging trends and needs within social care, using data and evidence to drive forward wide scale change.

The information within this summary has been produced by Skills for Care using the Adult Social Care Workforce Data Set (ASC-WDS). We use the data collected by the ASC-WDS to create workforce models that, in turn, allow for estimates of the whole adult social care workforce and its characteristics to be produced. The * notation indicates a figure has been suppressed.

Throughout this report, charts and tables will display rounded whole numbers and percentages. Therefore, it should be noted that charts and tables may not always total to 100%.

The independent sector information in this report was collected between April 2022 and March 2023, and local authority information dates from September 2022.

Lee Mummery, Head of area:

It gives me great pleasure to be able to share with you Skills for Care's latest annual analysis of the Eastern regions adult social care sector and its highly valued workforce. This report, which provides workforce data at a regional, local and organisational level, provides social care employers and stakeholders the ability to review, analyse and understand their workforce and it will also help them to understand where challenges and trends exist and to target their workforce planning and support where it is most required and where it will have the greatest impact.

I would like to thank all of the Adult Social Care providers and Local Authority colleagues in the Eastern region who have contributed their workforce data to the ASC-WDS, without whom the production of this vital intelligence would not be possible.

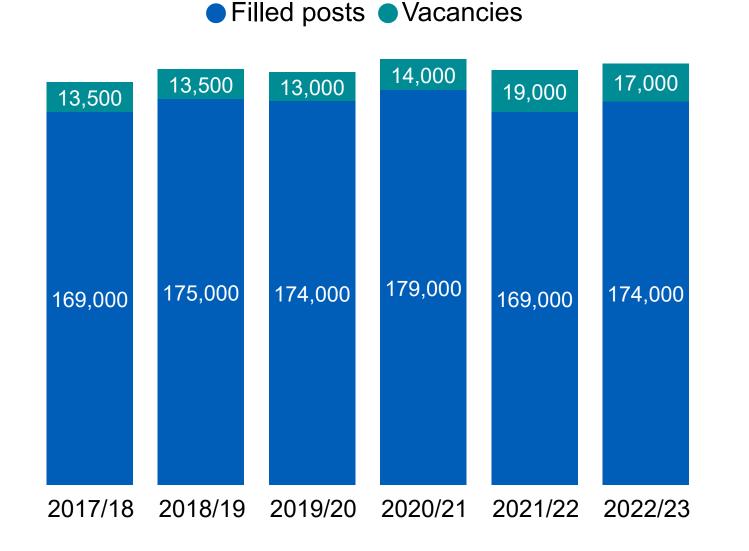

A summary of the adult social care sector and workforce in Eastern, 2022/23

Size and Structure of the workforce

In 2022/23 the adult social care sector in the **Eastern** region had an estimated **1,900** organisations with **4,300** care-providing locations. The total number of posts was **192,000** (a change of 3,300 from 2021/22). Of these posts, **174,000** were currently filled by a person, called 'filled posts' (2.9 % change since 2021/22) and **17,000** were vacant posts (vacancies) that employers were actively seeking to recruit somebody into (a change of -8.7 % since 2021/22).

Number of posts from 2017/18 to 2022/23 (all sectors)

Recruitment and retention

Skills for Care estimate that the staff turnover rate in the Eastern region was **29.9%**. Not all turnover resulted in workers leaving the sector, since **61 %** of starters were recruited from within the adult social care sector. Therefore although employers need to recruit to these posts, the sector retains their skills and experience.

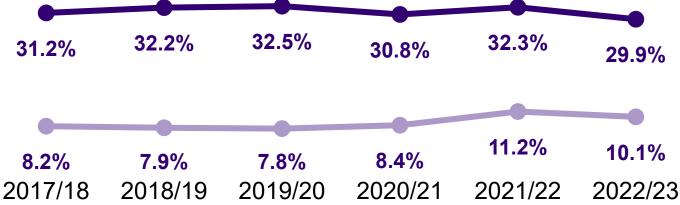

The vacancy rate in the Eastern region was **10.1%** which equates to around **15,500** vacant posts. The Vacancy rate peaked in 2021/22 before decreasing slightly in 2022/23.

Turnover and vacancy rate trends

- Vacancy rate - Turnover

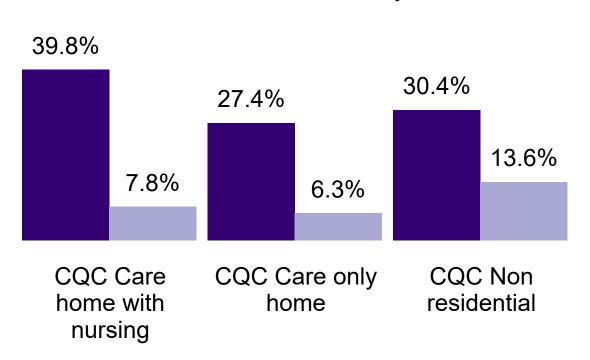

In the Eastern region there were an estimated **151,000** filled posts split between local authorities **(12,000)** and the independent sector **(139,000)**.

From this point the figures in this report refer to the **151,000** filled posts in the independent and local authority sectors in the Eastern region only. Filled posts for direct payment recipients and adult social care related posts in the NHS are not included.

Turnover and vacancy rates varied between service type in the Eastern region as shown in the chart below in 2022/23.

Turnover rate and vacancy rate by service type

Turnover rate Vacancy rate

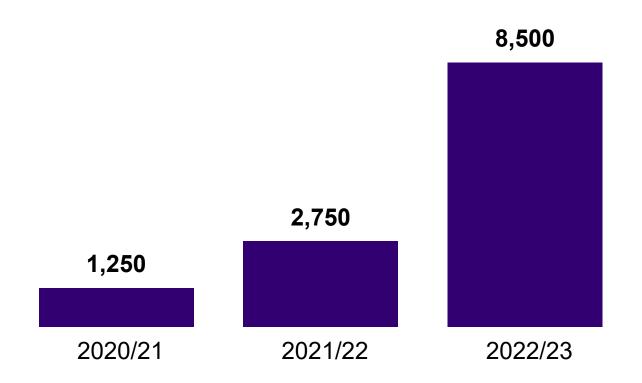

Recruitment and retention

The starters rate in the Eastern region between 2021/22 and 2022/23 changed from 32.3 % to **32.6%**. This varied regionally but is still lower than the peak of 2018/19 and 2019/20.

The starters rate in England for **2022/23** was **32.2%** which is a **1.4** percentage point increase from the previous year.

The chart below shows data for direct care providing roles in the independent sector. International recruitment has increased in 2022/23. This is mostly due to care workers being added to the Shortage Occupation List in February 2022. Note that these figures include those on a Health and Care Worker visa and those arriving by other routes.

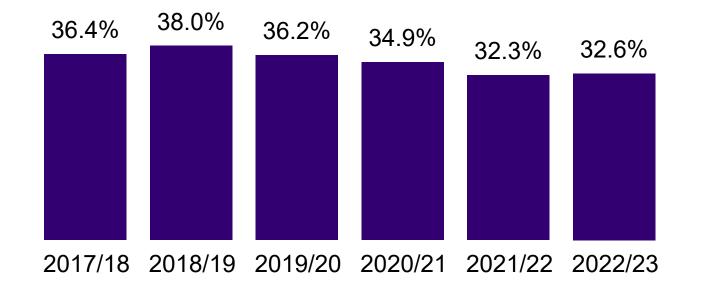

International recruitment in Eastern

Employment overview

The majority (89 %) of the workforce in the Eastern region were employed on permanent contracts. Over half of the workforce (56 %) usually worked full-time hours and 44 % were part-time.

Starters rate trends

The Eastern region had an estimated sickness rate of **5.4** days per employee.

Adult social care has an experienced 'core' of workers. Workers in the Eastern region had on average 9.4 years of experience in the sector and **77**% of the workforce had been working in the sector at least three years.

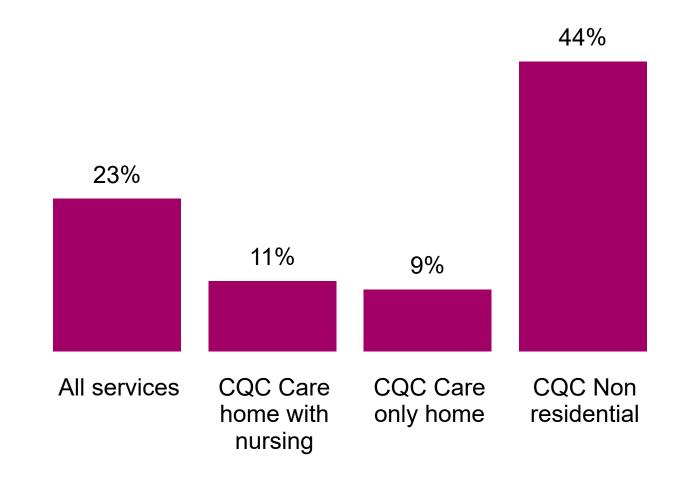

For more information about changes in the workforce since March 2023 please see our monthly trackers on the Workforce Intelligence website.

www.skillsforcare.org.uk/Monthlytracking

For more information about challenges in workforce supply and demand and for a highlight of the most recent trends and changes, at England level, please see the opening section of the 'State of' the adult social care sector and workforce report available at: www.skillsforcare.org.uk/Stateof

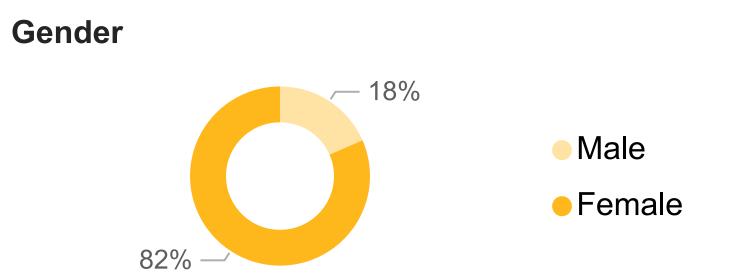

In the Eastern region around 23 % (or 35,000 filled posts) of the workforce were recorded as being employed on a zero-hours contract. Non residential care services had the highest proportion of workers employed on zero-hours contracts at 44 %.

Zero-hours contracts by service

Demographics

The adult social care workforce comprised of 82 % of female workers in the Eastern region, compared to 47% of the economically active population in England. Female workers were less likely to be in managerial roles, especially in senior management roles (72 %), compared to direct care providing roles (82 %).

The age distribution of the adult social care workforce in Eastern was older than the economically active population. The average age of the adult social care workforce was 45.

Around (28 %) of adult social care workers were aged 55 and over, compared to 21% of the economically active population. From a workforce planning perspective, these workers may retire within the next ten years. Registered nurses remained one of the most diverse job roles, with 56 % of workers with a white ethnic background. Senior managers and occupational therapists were among the least ethnically diverse job roles (both reported 87 % and 86% respectively of workers with a white ethnic background.

<u>Pay</u>

For the purpose of this report the National Living Wage (NLW) of £9.50 per hour is referenced to match the period in which the data was collected. In April 2023, after the data in this report was analysed, the National Living Wage had increased to £10.42.

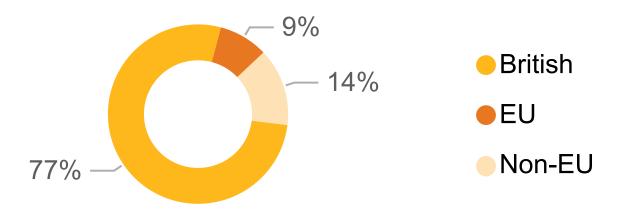

Nominal pay shows pay rates as they were at the time, whereas real term rates are adjusted to take inflation into account. Hourly rates are expressed in 2022/23 prices. As shown in the chart below, in the Eastern region, real term pay increased until 2021/22 where it saw a decrease. It decreased further in 2022/23 due to high inflation over the period.

Care worker average pay, independent sector

—— Nominal Hourly Pay – – – Real Term Hourly Pay

In the Eastern region around 77 % of the adult social care workforce were British, 9 % were of EU nationality and 14 % were of a non-EU nationality.

Nationality

Staff with a white ethnic background made up 77 % of the adult social care workforce in the Eastern region. People with an Asian/ Asian British ethnicity made up 8 % of the workforce, and the population. People with a Black / African /Caribbean / Black British ethnicity made up 12 % of the adult social care workforce.

2017/18 2018/19 2019/20 2020/21 2021/22 2022/23

Pay varies by sector as shown in the chart below, local authority pay is generally higher than independent sector pay.

Care worker average pay, 2022/23

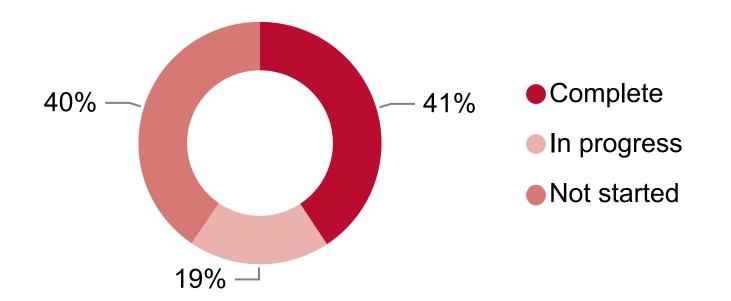

Qualifications and training

Skills for Care believe that everyone working in adult social care should be able to take part in learning and development so that they can carry out their roles effectively. Learning and development helps everyone to grow in the right skills and knowledge, enabling them to provide high-quality care and support.

In the Eastern region around **60** % of direct careproviding staff who had started work in the sector since January 2015, had engaged with (achieved, partially completed, or were working towards) the Care Certificate.

Direct care workers Care Certificate status

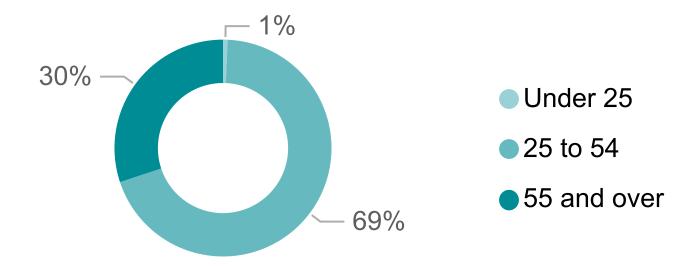

Around **44** % of direct care-providing staff held a relevant adult social care qualification in the Eastern region.

Registered managers

In the Eastern region the proportion of registered managers that were aged 55 and above was **30%**, equivalent to around **900** workers. From a workforce planning perspective this is a concern as they may be close to retirement age.

Registered manager age band

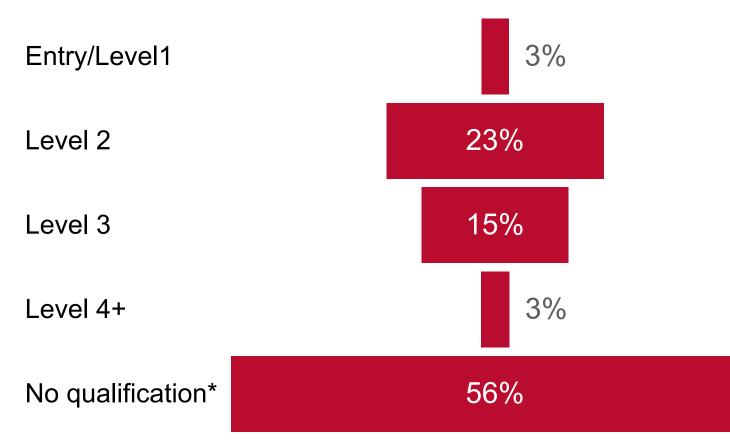

The proportion of registered managers in the Eastern region that had a qualification that was Level 5 or above was **54%**.

The vacancy rate of registered managers decreased from 13.3% in 2021/22 to 11.6 % in 2022/23. As at March 2023 there were around 380 vacant posts in the region.

The turnover rate in 2022/23 was **24.5%** which was lower than the rate for 2021/22 (**26.5%**) as shown in the chart below.

Factors affecting turnover

Using ASC-WDS information, we created machine learning models to assess which variables influenced adult social care workers' propensity to leave their posts. From this, key variables were identified that could be compared to turnover rates. The information below shows the relationship between these key variables and turnover between March 2022 and March 2023.

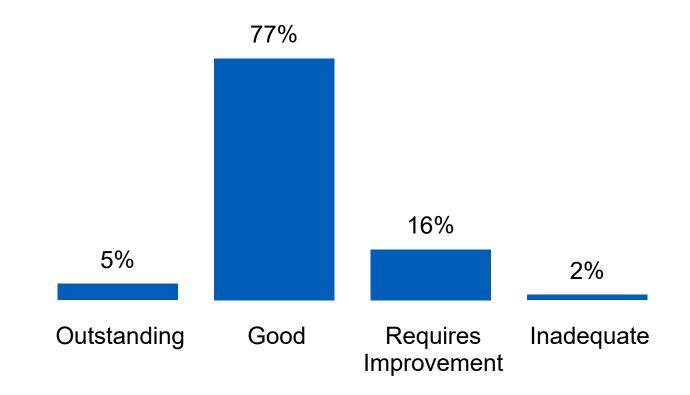

- A large proportion of staff turnover arose from workers leaving their posts soon after joining.
- Workers that travelled further were more likely to leave.
- The adult social care sector has found it difficult to retain younger workers.
- Workers were more likely to leave if they were employed on zero-hours contracts.
- Turnover rates were higher if the registered manager was new to their role.
- Likelihood of high turnover rates increased if the establishment had historically high turnover.
- Workers with high sickness rates were more likely to leave.
- Care workers paid above the minimum rate were less likely to leave their roles.
- Care workers who received regular training were less likely to leave their roles.

<u>CQC-regulated services</u>

As at March 2023, the Eastern region contained 3,240 CQCregulated services.

In the Eastern region the majority of CQC ratings were reported as *good*, this was similar to across England where **79%** of CQC-regulated services were recorded as *good*.

CQC ratings - March 2023

LA and ICB level data

Interactive visualisations have been created at a LA and ICB level, to enable you to see and understand your workforce intelligence in a more visual way. One allows you to see your area in more detail and another to compare areas. To access the visualisations, please see www.skillsforcare.org.uk/localinformation

- Care workers with social care qualifications were also less likely to leave their roles.
- Care workers recruited internationally were less likely to leave than people recruited domestically.
- Care workers in a role with several positive employment factors were more likely to remain in post than care workers in a post that did not.
