

Skills for Care Digital learning for managers technical specification

Product description:

Skills for Care has created an exciting digital learning tool to help frontline leaders and managers develop their knowledge and skills in leadership, succession planning and developing future talent.

The 11 modules were developed from the Manager Induction Standards and the topics are explored through real life case studies and scenarios with opportunities for learners to reflect and complete further self-directed learning.

The digital learning is visual, simple to follow and reflects different settings across adult social care.

Screen size: The modules are a fixed size of 970x630px. This size is optimised for a screen resolution of 1024x768 or larger.
