

Map your organisation's values onto the example values and behaviours framework

Look through the [example values and behaviours framework for adult social care](#) to help you to understand how each value is defined. Then look at your own organisation's values, how they are defined and any behaviours or competency frameworks you already have in place.

In the boxes next to each value below, write which of your values and behaviours is most closely aligned to each of the example values.

Are there any values which your organisation has which are not reflected in the example model? Make a note of them here.
